Challenges

(Google Apps Deployment, Training, Custom Development)

We have faced following challenges during migration to Google Apps.

- Migration of Email Data from existing Mail server to Google Apps
- Setting up Dual mail delivery Process
- Configuring email accounts in MS Outlook and Mobile devices
- Training on Google Mail, Google Calendar, Google Sites(custom development) and Google Docs

Results

The switch to Google Apps has drastically reduced their maintenance time and spending, and increased the ease of collaboration and communication.

- Email data migration was completed in a week using Google Apps IMAP Migration tool
- Dual Mail delivery was setup from their legacy servers until the smooth transfer
- Successfully trained the users on using Google Mail, Google Calendar and Google Docs effectively.
- Employee collaboration through chat and sites integration.
